

Jira & VSTS Integrations

Better connect Product and Engineering by integrating UserVoice with your favorite development tools. Create and link new stories to customer feedback and view Engineering statuses directly within UserVoice.

FEATURES

Product managers can now get more done directly within UserVoice. Jira & VSTS integrations enables you to:

- Improve workflow efficiency through two-way sync between systems allowing visibility into UserVoice and Jira and VSTS
- Improve visibility between product and engineering while maintaining existing systems and workflows
- Have a single source of truth for customer feedback so engineering can see the original customer feedback, rationale for building a feature, and understand the impact

PRICING

Jira and VSTS integrations are available for all UserVoice 3.0 plans.

HOW TO GET SETUP

If you are currently a UserVoice 3.0 customer, get setup by following the instructions: [For Jira](#) / [For VSTS](#)

If you are not yet a customer, email us at sales@uservoice.com.
